

# LEVELS OF ALIEN INTERFERENCE

From *Alien Cicatrix*, p. 21-26 by Corrado Malanga

Translated by Godfire

There are 5 levels of alien interference, of which we have known only the first, before my studies.

## THE FIRST LEVEL OF ALIEN INTERFERENCE

The first level of alien interference describes the abduction as an invasive phenomenon, in which some little beings, dark gray or black colored, sometimes blue colored, take the subject and bring him in a technological place where he is undergone to surgical procedures, on a sort of operating table; both males and females are implanted with control microchip. This is all what appears clear among what the American researchers have exposed. Actually the situation is more complicated. In fact, there are at least twelve alien races that have to do with the humanity, even if with different methods, they are searching the same thing, as we will see up ahead.

## THE SECOND LEVEL OF ALIEN INTERFERENCE

The hypnotic environment and contexts which let reach the exposed conclusions will not be described here. Also here are no technical explanations, cause otherwise there will be necessary various books: I will just expose the basic conclusions coming out from the research.

We found out immediately that there was a problem regarding the mammal kind for which we had a solution. **They were looking for immortality!**

No matter that I,,m convinced of boring nature of the immortality, I“m aware that not everybody think it the same way. The aliens“ desire of immortality and the determinacy that they have demonstrated on following that target perplexed me enough regarding their level of intellectual maturity. But I continued my research: maybe there was some mistake.

Under hypnosis all the abductees reported always the same: “The aliens live across us and our mind...”

In that kind of abductees there is a strong brain dichotomy which may be identified by any psychiatrist as an acute schizophrenia. However the detailed analysis of the subjects shows that they were completely healthy mentally. They usually feel different, as if they were not from this world. They had some flash-back in which they were remembering the past lives and images by an alien context, as if themselves were aliens.

Obviously they had some access denied zone in their brain where there were hidden the memories about alien“s life: so it means that the results of hypnosis could be real. Namely

the brains of abductees are used as a store by the aliens for their memories (by informatics terms it would be some kind of back-up).

By that hypothesis the aliens are looking for the immortality which they still can't reach. Cause no matter that they already live more than us, at the end they also die. But they are able to make their memories survive inserting them into the brain of some terrestrial baby

– an entire life memory of some alien into the brain of some terrestrial baby which may also die after that. The baby grows up and at some point of his/her life the person's brain may show the signs of other personality which would create a lot of problems in her/his existence. The alien memory remains anyway inaccessible, except if we don't use some kind of key-procedure (similar to the password of computer), which would be able to open it and liberate its content. Before the death of back-up abductee, the aliens return and copy all the content if it is necessary into the brain of one of their newborn.

He reserves the memory and survives becoming all one with the previous terrestrial host. In this way his personality survives even if his body dies and he reaches a surrogate of immortality. The newborn alien will not need to make the whole experience starting from the very beginning till the end, for example, an alien (or his personality) 30.000 years old would be formed of the memories of 6 aliens with 5.000 years life duration per each of them. Plus an elevated number of terrestrial memories of abductees used for back up. The final product of application of this idea will be a single personality in evolution which uses a lot of bodies in order: a kind of pseudo-immortality that permits the aliens to conserve all the fundamental characteristics of their original meaning.

It is noted that the aliens prefer the human brain for back up of their memories, actually the abductees were told many times during the abduction that: "Your brain is perfect: the machines may be broken, but the human brain won't...".

Here we understand what they mean when they say: "We live across your brain...!"

The application of intelligent hypnotic methods permits us to elaborate a key-procedure in order to access to the hidden alien memories into the abductee's brain. So we dispose a big reserve of information about alien lives, including their language. The procedure is tested and reproducible on the abductee in any laboratory. The study of alien phonemes actually is continuing. But we will talk about it in other occasions.

The key-procedure is an important discovery without any doubt. I decided to verify if there are the "carriers", namely the traces of the memories of previous back up abductees/transporters in the access denied part of the brain of actual abductee as our brain should be an undeletable memory (a real and proper ROM – Read Only Memory). Actually in the brain of the abductee there must be present the memory of one alien composed by many sequential fragments and the memories of all those who served the aliens as a back-up. The confirmation of that hypothesis was a great satisfaction.

The work of Weiss, the American psychiatrist who solicited the memories of past lives by the hypnosis, must be re-interpreted? There is no reincarnation and it is simply about the memories which are not ours actually, but they belong to the previous back up

abductees? Later we realized that the things were more complicated: actually the other aliens. It is more than a simple back up of the memory.

### THE THIRD LEVEL OF ALIEN INTERFERENCE

I found the memories of locust or serpent kind aliens in the abductees that I have studied: how it is? The brain of reptilians or locusts are compatible with the human brain?

Maybe the right answer is following. The memory of some locust kind alien answered under hypnosis: "your brain is bigger than ours. We use it all: the space that you don't use is used by us. We have created you this way on purpose, in your DNA you have got both reptilian and our DNA. That's why we are so compatible."

During the hypnosis there were coming out both insect and reptilian environment. I was thinking what would happen if the back-up abductee would die suddenly in some accident or anything else: the aliens would lose millions of years information together with the abductee. They couldn't let it be!

What we would do if we were them? The obvious step: to copy the brain of abductee. However, in order to obtain the complete function, we should make a copy of the whole body. The body is not so important, but it is necessary to keep alive the brain with the precious info about the alien life.

During the hypnosis there came out sometimes the memory about the "resonance room" "matrioska room", "metallic cylinder room", these are definition given by the various abductees describing the same situation. Namely it was about the copy process to which the abductee assists across the lateral whole of the metallic cylinder in which they were put while in the same time there was his/her copy in other transparent, vertical cylinder. A real copy of abductee with all info inside the brain.

The involved person as a result loses the proper personality and suffers of psychological crisis difficult to support. It seems that the copy is saved in some secure place in a kind of "freezer" as a reserve back up, the original is to be brought back to his home.

These kinds of operations are done in some subterranean place by presence of terrestrial militaries! (I have got exhaustive answers to explain the reason of terrestrial militaries presence, but we will talk about it in other occasions). The most important question at that point of research was: "What do they take down there: the copy or the original?"

We would keep the original. And the aliens? The memories of copy and original were the same completely, so there was no difference which could help to solve the problem. But seems that the aliens had a weak point in their procedure: the cylinder where they insert the abductee was horizontal (by the first description) while the copy was created in vertical cylinder. So if the abductee under hypnosis remembers that goes out from the same cylinder, it means that he is the original. If he goes out from the vertical one, so he is the copy. The abductee remembers going out from the different cylinder, so he is the copy!

**It was an error.** Actually I found out that there were 4 rooms with cylinders. Each of them had a precise function. But under hypnosis sometimes the memories were mixed or

overlapped. We will see later why. Actually the original comes back home always as it was stated by the results of hypnosis.

#### THE FOURTH LEVEL OF ALIEN INTERFERENCE

There was happened something strange during the process of copy of human body by aliens. The abductee describes a strange sensation, some vibration passing through body. There was a lot of light in the cylinder and then something detaches and vibrates in air.

By that moment the abductee describes the scene from upside and sees both of cylinders, the metallic one and the another one transparent. Both vertical. His original body in the first one, and something else in second one. What is that third position? At first view it seems impossible, even without discussing about the accuracy and credibility of hypnosis techniques when it is done properly.

So it is necessary to stipulate some kind of question chain in order to understand who answers:

- An alien with its memory?
- A copy?
- An original?
- One of carrier memories?

The chain of questions was simple like following:

What is your name? How old are you?

What is the date?

Watch your hands and describe them.

But the answers were terrifying!

Question: "You are looking down?" Answer: "...No." Question: "So how can you see what is going on under you?" Answer: "... I don't look down, I'm watching contemporarily everywhere..." Question: " Watch your hands." Answer: "... I don't see the hands." Question: " Watch your body." Answer: "... I don't have a body." (perplexity) Question: "What is your name?" Answer : "... **We** don't have a name..." Question: "How old are you?" Answer: "... What does it mean?..." Question: "By how long time do you exist?" Answer: "... By always..."

So there came out the creature which defines itself as a "**matrix of light points**" living between "**this and that time**", they present themselves as " the **human Soul**"! The thing which gives you an **eternal life**!

Yes, that is what the aliens look for... now everything is clear.

In around one year of research I understood that the aliens were trying to catch the matrix light points in order to use it for their targets.

Terrible! But fortunately, at least from the first analysis we got that they still couldn't reach that target. To keep the Soul constantly and for a long time was impossible for them because of the incompatibility between their and Soul's biogenetics. The Soul was

perfectly aware of these facts, but didn't stop them or cause it didn't want or couldn't. During the hypnosis there came out the description of a strange force camp which transports the Soul into the body of aliens. But the union went on only few time after which the Soul detached totally and irreversibly. It was making crazy the alien which one more time has failed and couldn't get united to the matrix light points.

Actually we have something in our DNA which is compatible with the Soul as it is declared also by various alien memories inserted into the brain of abductees. It is possible to activate the alien memories of abductee across some kind of password. It is like watching the secret papers of the aliens without being noticed. The compatibility of our DNA explains the reason of the experiments done by aliens in order to use our DNA. Probably they try to change their DNA in order to be similar to ours. The Soul was very clear during the interrogation: the abductees have the Soul besides the other requisites. **The Soul that not all human beings have got!** (approximately 20/25% of people).

Furthermore the Soul after detachment doesn't stay for a long time in the body of alien, so after that they put the Soul into the copy of abductee for a while and then put it back into the original body of the abductee which is the unique body compatible for a long time. They don't take away the Soul of abductee for a long time.

"The Soul can't be copied.", say the matrix light points during the interview under hypnosis with me "The aliens know it and so they try to use your Souls. But they need to modify their DNA in order to be able to connect the Soul to their body." That's why the aliens try to create some bridge – race between us and them across the genetic experiments which they do on us. That race should possess this important piece of compatibility of DNA. Only after that they will be able to rip off the Souls from the habitants of our planet or other planets and they will keep the Soul forever. That is the alien agenda.

All the abductees repeat exactly the same things. No exception! It was time to say the truth to them.

This is the secret of Life Tree, Hebrew Cabbala, the Egyptian constructions of pharaohs, the Indian Kundalini and the so called saint grail searched by many secret sects.

Everything was simple: something in our DNA was the source of eternal life and the aliens were looking for having it from us. We even don't know about the existence of this strange thing.

The Life Tree of Terrestrial Paradise which is visible also in some crop circles: that is the thing which the aliens search in some of us, only in some of us.

## **THE FIFTH LEVEL OF ALIEN INTERFERENCE**

We were missing still one ring of the chain: the ancient Egyptians actually were talking about the physical body, the Mind and the Soul, but also about the Spirit. We didn't know what it was about.

In short, we found out some alien memories into the brain of abductees which were totally different than us: the light beings, of different nature, which live a long time, but they were mortal anyway. **Cause only the Creator and some human beings possess the Soul.**

These light beings probably were the “immortal spirits” defined by our mythological culture. They control the aliens which organize the abductions and those aliens control the Grey “cyborgs” which control the humanity.

The light beings had something similar to the “Spirit”, but different than the Soul.

There are different kinds of human being:

1. **The Body with Mind.**
2. **The Body with Mind and Soul.**
3. **The Body with Mind and Spirit.**
4. **The Body with Mind, Spirit and Soul.**

So we understand now also the so called phenomenon of “diabolical possession” which means that the person doesn’t like the strange light beings inside himself - that parasite and negative creature inside. Are there any negative creatures which can live inside the persons possessing the Soul?

Did the light being prefer to live there in order to absorb the Energy of the matrix of light points – namely the Soul for eternal life?

Everybody want the Soul, cause it means an eternal life and all that creatures come to the unique place where the Soul stays who knows maybe by mistake.

Finally I have got the solution of all these phenomenon. This explanation brings together the physics, the metaphysics, the esoteric science and the history of our planet.
